

ProActive Business Ecosystem Datasheet

Expanded managed IT and security operations for businesses that need backup, BCDR, awareness training, risk reporting, and planning discipline.

ProActive Business Ecosystem is for companies that need Digerati Experts to take broader ownership of IT and security operations. It moves beyond workplace support into backup/BCDR, cloud storage protection, threat detection, SOC involvement, security awareness, and recurring business review discipline.

Best fit	Companies where downtime, ransomware, access control, employee risk, and planning gaps would create material business impact.
Primary outcome	A stronger IT/security operating program with backup resilience, risk visibility, user training, and recurring planning.
Engagement type	Full-service managed IT/security ecosystem with broader operational and security controls.

What this package is for

- Reducing business exposure from downtime, ransomware, accidental deletion, and access gaps.
- Creating recurring technology planning instead of waiting for emergencies.
- Building a more complete security posture across identity, endpoints, email, backup, network, and users.

Included focus areas

- Endpoint backup, BCDR, and user cloud storage protection.
- Threat Detection and SOC/security operations coverage.
- Security Awareness Training included for users.
- Practical risk/compliance reporting included for leadership visibility.

Strategy cadence and business rhythm

- Budgeting and planning support included.
- Technology business reviews and security business reviews occur twice per year.
- Recommendations are tied to risk, business impact, cost, and implementation priority.

Common add-ons or scope drivers

- Multiple sites require Digerati Experts network solutions.
- Company spend-card lifecycle controls are required/included or available depending on final design.
- Compliance obligations, advanced reporting, and audit preparation may increase scope.

Typical deliverables

- Backup and BCDR coverage map
- Security operations summary
- Risk/compliance reporting package
- Semiannual business and security review
- Prioritized roadmap and budget guidance

Next step

Schedule a Cyber Risk Assessment to confirm the right service level, required controls, and implementation roadmap.

Note: This draft is written for Digerati Experts public resource use. It avoids customer names, logos, and vendor-specific claims. Final service scope depends on assessment results, user count, endpoints, sites, compliance needs, backup scope, and selected add-ons.
