

ProActive Office Ecosystem Datasheet

Managed IT, workplace operations, secure productivity support, network connectivity, and endpoint backup for growing offices.

ProActive Office Ecosystem is built for companies that need Digerati Experts to manage the everyday employee technology environment. It adds workplace operations, productivity platform support, endpoint backup, and managed network/connectivity guidance over the ProActive IT baseline.

Best fit	Businesses with employees, workstations, office connectivity, and productivity platforms that need more than basic support.
Primary outcome	A stable office technology environment with secure onboarding, workplace tools, endpoint backup, and managed connectivity.
Engagement type	Managed office ecosystem package - estimated public starting point: \$165/user/month.

What this package is for

- Improving the daily employee technology experience.
- Managing user provisioning, productivity tools, and device/workplace technology.
- Reducing risk from weak access controls, unmanaged devices, and inconsistent offboarding.

Included focus areas

- Managed Workplace support for users and productivity platform SKUs.
- Support for Microsoft 365, Google Workspace, and Zoho environments.
- Endpoint backup included for covered endpoints.
- Managed Network & Connectivity included for office reliability and secure access planning.

Optional add-ons

- SOC/security operations can be added when threat monitoring and security response maturity is needed.
- Security Awareness Training is an add-on at this level.
- Company spend-card lifecycle controls are optional when clients want stronger workplace offboarding controls.

Strategy cadence and scope

- Includes one combined technology and cyber review per year.
- Support is designed around 8x5 operations with standard response and faster critical response targets.
- Final coverage depends on the Cyber Risk Assessment, user count, endpoints, locations, and backup scope.

Typical deliverables

- Office technology operating model
- User onboarding/offboarding workflow
- Endpoint backup baseline
- Productivity platform support map
- Annual technology and cyber review

Next step

Schedule a Cyber Risk Assessment to confirm the right service level, required controls, and implementation roadmap.

Note: This draft is written for Digerati Experts public resource use. It avoids customer names, logos, and vendor-specific claims. Final service scope depends on assessment results, user count, endpoints, sites, compliance needs, backup scope, and selected add-ons.
