

UCaaS / Voice & Meetings Datasheet

Unified phone, meetings, messaging, and communications support for businesses that need reliable voice and collaboration inside a managed IT strategy.

UCaaS / Voice & Meetings is offered as an infrastructure add-on when clients need a better communications platform. Digerati Experts helps align business phone, meetings, user access, device readiness, number planning, and support workflows with the broader IT and security environment.

Best fit	Businesses replacing legacy phones, consolidating communication tools, opening new offices, or standardizing user calling and meetings.
Primary outcome	A cleaner communications environment with better user experience, supportability, and lifecycle management.
Engagement type	Optional infrastructure add-on that can support ProActive Ecosystem clients or scoped standalone projects.

What this service is for

- Replacing fragmented phone and meeting tools with a more supportable environment.
- Helping employees communicate from office, remote, and mobile work contexts.
- Aligning communication tools with identity, device readiness, onboarding, and offboarding.

Core planning areas

- User and department call flow mapping.
- Number inventory, porting readiness, and phone assignment planning.
- Meeting and collaboration requirements.
- Network readiness review for voice quality and reliability.

Security and lifecycle considerations

- User access should be managed through defined onboarding/offboarding workflows.
- Administrative access should be limited, documented, and protected.
- Departing employees should lose access to communication systems as part of standard offboarding.

Where it fits

- Optional infrastructure add-on when clients build a package.
- Useful during office moves, new site launches, phone replacement, or collaboration platform cleanup.
- Can be paired with Managed Network & Connectivity and Managed Workplace for stronger operational results.

Typical deliverables

- Voice and meeting requirements map
- User/extension planning sheet
- Number and call flow checklist
- Implementation roadmap
- Support and lifecycle recommendations

Next step

Schedule a Cyber Risk Assessment to confirm the right service level, required controls, and implementation roadmap.

Note: This draft is written for Digerati Experts public resource use. It avoids customer names, logos, and vendor-specific claims. Final service scope depends on assessment results, user count, endpoints, sites, compliance needs, backup scope, and selected add-ons.
