

Sample Quarterly Business Review (QBR)

A leadership-ready sample showing how Digerati Experts reviews technology health, security posture, support trends, projects, budget items, and next-quarter priorities.

The QBR is designed to keep technology decisions connected to business outcomes. Instead of only reviewing tickets, the conversation focuses on risk, reliability, employee experience, upcoming projects, budget planning, and the decisions needed to keep the business moving securely.

Best fit	Clients in ProActive Business, ProActive Enterprise, or strategic engagements that need recurring planning and leadership visibility.
Primary outcome	A structured business review that turns IT/security activity into priorities, decisions, and a practical roadmap.
Engagement type	Semiannual in ProActive Business; quarterly in ProActive Enterprise; available by scope for strategic clients.

Sample QBR agenda

- Executive summary and major changes since last review.
- Support trends, recurring issues, and employee experience observations.
- Security posture update, major risks, and remediation progress.
- Backup/BCDR readiness and recovery posture.
- Project status, lifecycle items, and upcoming decisions.

Example metrics to include

- Ticket volume and response pattern by category.
- Endpoint health, patching posture, and device lifecycle status.
- Security awareness participation and phishing risk indicators.
- Backup completion trends and restore testing status.
- Open risks, accepted risks, and remediation deadlines.

Leadership decisions the QBR should drive

- Which risks need budget now versus later.
- Which systems or devices should be replaced before failure.
- Which policies, access changes, or user controls need approval.
- Which projects should be scheduled for the next quarter.

How Digerati Experts uses the QBR

- To keep the client roadmap active and practical.
- To document decisions, tradeoffs, and accepted risks.
- To connect IT operations, security, compliance, and budget planning in one leadership conversation.

Typical deliverables

- QBR agenda
- Executive summary page
- Risk and project roadmap
- Budget/action list
- Decision log for leadership follow-up

Next step

Use this sample to decide what reporting cadence your organization needs, then schedule an assessment to confirm the right QBR scope.

Note: This draft is written for Digerati Experts public resource use. It avoids customer names, logos, and vendor-specific claims. Final service scope depends on assessment results, user count, endpoints, sites, compliance needs, backup scope, and selected add-ons.
